

About sMaRT DesigNZ

We are a small, independent 3D printing business that operates right in the Buckeye state! We specialize in custom 3D prints from large custom part molds to simple decorative models, if it can be modeled and printed, we can get it done.

Our Core Values

- QUALITY & CRAFTSMANSHIP
- FAST TURNAROUND
- CUSTOMER-FOCUSED SERVICE
- INNOVATION & CREATIVITY

Custom Quality 3D Prints

We are operating as a small team of six and can assure that you will get the best one-on-one work experience out there.

We take pride in knowing that our designs bring inspiration and innovation to your space. Your satisfaction is our top priority.

3D Prints for Every Project

Custom Parts

Do you need a replacement part that is not available? Want a customized part for your business or hobby? Dust collection can be a challenge, we can help with proper fit for your vacuum system. Do you have a tool that is either just too small or just too big? Your idea can be translated into a 3D print

Decorative Models

Do you like dinosaurs, dragons, cats or dogs? What is your favorite holiday to decorate for? Football, hockey, disc golf, race car, motorcycle racing, or whatever you are into, we can turn your interest into a 3D work of art. We can 3D print your mascot or team names for keychains, plates, or 3D relief.

Organizers for Office and Home

We can create nearly any shape and size of organizer you need for your office or home. Organizers for tools in drawers, on walls or on desk tops. Create your own customized peg boards of different shapes with special holders or attachments. Let us help you organize your small items in custom made drawers, containers, boxes, stands or shelves.

Expand Your Creativity

Starter Models

We can help with expanding your creativity by printing a white (blank) model for you to paint or decorate as you wish. Do you need a 3D model to make a silicon mold for your resin projects?

Increase Your Creativity

We can create cutters, rollers, or stamps for your clay projects. Embossing rollers for paper art or stationary. Templates can be 3D printed for your drawings, quilting patterns, paper art, drafting/flow charts, or children's art. 3D printed outlines for your favorite sun catcher to be used with your specific medium.
